Patrick J. Coyne, Esq., joined JAMS after a long and distinguished career as a trial and appellate attorney. Mr. Coyne is widely recognized for his breadth of knowledge and experience in the field of intellectual property law, including patent, trademark, copyright, data rights, privacy and trade secret matters. As a private practitioner, he also assisted clients with strategic portfolio development and management, licensing, valuation and transactional matters.

Mr. Coyne has tried over 100 cases in state and federal courts, including the United States Supreme Court. He has also represented clients before the United States International Trade Commission (ITC), Patent Trial and Appeal Board (PTAB), and the Trademark Trial and Appeal Board (TTAB) of the United States Patent and Trademark Office (USPTO).

A seasoned alternative dispute resolution (ADR) practitioner who handles domestic and international arbitrations and mediations, Mr. Coyne has legal experience that extends well beyond intellectual property law. He handles complex business and commercial, antitrust and unfair competition, and product liability matters. He has, throughout his legal career, deftly negotiated hundreds of settlements on behalf of clients and participated in formal and informal mediation in virtually every case in which he has appeared as counsel of record for over 40 years.

Mr. Coyne holds a Bachelor of Science in civil engineering, with high distinction, from the University of Virginia, where he also studied nuclear engineering. He received his Juris Doctor from the University of Virginia School of Law and served as a law clerk and technical advisor to Circuit Judge Edward S. Smith of the United States Court of Appeals for the Federal Circuit during the first two years of the court's existence. Prior to attending law school, he has worked as an engineer, gaining experience in structures, dynamics, fluids, mechanics, controls and energy systems. He supported government contract programs on various solar energy programs, including large and small solar, photovoltaic, solar thermal, ocean thermal and biomass programs. His engineering experience has been instrumental in his legal career, enabling him to understand and assist parties in resolving legal matters involving complex technologies.

Mr. Coyne has earned a well-deserved reputation for his problem-solving skills and his ability to find common ground among parties to seemingly intractable disputes. He is conscientious, imaginative, creative, persistent and dedicated to helping parties resolve their disputes in a fair and efficient manner.
