The image viewer displays a patent document page. The header indicates 'Serial No. 09/457,474'. The text describes a method for detecting *Salmonella typhimurium* using primers MD31 and MDH2. It includes a 'REMARKS' section where the examiner objects to the disclosure due to a couple of informalities, specifically noting Chinese text on pages 5 and 13. The examiner states that the amendment has been amended by replacing the Chinese text with an English translation thereof. The applicant's response is noted as replacing claims 1-3 with new claims 4-6 to avoid the objections.
